Subject: UPDATE: ETS ISSUES

Below is an update based on a meeting with Tony Andrade:

1. We now have an in-depth rebuttal of all the main anti claims concerning workplace smoking. If you or somebody in your market would like to receive a copy, it is available from Helene Lyberopoulos or Davide Erro.
2. A well-known institute at Surrey University has been identified as a possible candidate to review the EPA methodology. We will further explore this possibility and decide whether to proceed.
3. Two weeks ago, much press attention was given to a UK "workplace smoking case". The law firm which decided to settle out of court has issued a press release explaining the decision and the implications for employers. This press release is available from Helene Lyberopoulos or Davide Erro and can be used freely. It supports our claims on issue.
4. A presentation on ETS/Workplace smoking is being prepared for the UK insurance industry. A copy of the presentation will be made available for you. If you feel that the insurance industry in your market should receive a similar briefing, please contact me or Tony Andrade.

Gerard
